Background

For almost 100 years fingerprint cards have been accepted as the standard for recording and storing fingerprint identification data. Over that period, format and quality of fingerprint cards has been revised and refined. Fingerprint cards are now accepted as a national standard for the exchange of fingerprint, identification and arrest data between criminal justice agencies. Unfortunately, because fingerprint cards must be physically transported and processed, substantial delays are introduced into the identification cycle.¹

Delays of several months are common with fingerprint card submissions. Lost and unreadable fingerprint cards can extend the delay. An advanced solution is needed. The advanced solution is Secure Fingerprint **Card-Scan**TM Service.

Live Scan As Close As Your Mailbox

IDEal IDentification Inc. Live Scan Fingerprinting Solutions developed Secure Fingerprint **Card-Scan**TM Service to convert fingerprint cards to Live Scan for fast and secure submissions of candidate data to law enforcement for Level 2 background checks. Clients mail the Secure Fingerprint **Card-Scan**TM Service Form (from anywhere in Florida, the U.S. or around the World), completed APPLICANT (FD-258) fingerprint card and payment directly to IDEal IDentification Inc. Live Scan Fingerprinting Services. Fingerprint cards are converted to Live Scan on a special FBI-approved high resolution scanner and Live Scan software. Secure Fingerprint **Card-Scan**TM Service background check results come back just as fast as Live Scan because Secure Fingerprint **Card-Scan**TM is Live Scan. Don't have a fingerprint card? No Problem. IDEal IDentification will send your FD-258 fingerprint cards at no charge.

Who should use Secure Fingerprint **Card-Scan**TM Service?

Secure Fingerprint **Card-Scan**TM Service can be used by clients who currently use fingerprint cards for non-retained fingerprint submissions, who are outside the state of Florida, not in close proximity to secure live scan service in Florida or who process large numbers of fingerprint background check candidates.

Clients also receive a detailed TCN Report for each candidate submission. The Transaction Control Number (TCN) Report includes the TCN and submission tracking confirmation. This Report provides live scan file delivery information to FDLE. This advanced service creates a new standard for secure live scan candidate submission tracking.

Privacy Policy Notice

Security of your private information is also assured with IDEal IDentification's Privacy Policy Notice. Your personal information is never sold to 3rd parties.
